

# Lists

---

## About Lists

Lists can be used to create and maintain sets of data for use when creating [rules](#). Lists allow you to easily reuse the same sets of data across multiple rules. Lists can be created on individual sites (Site Lists) as well as the corp as a whole (Corp Lists) to be easily used in multiple sites.

For example, you could create a list of prohibited countries that you don't do business with. You could then use this list in any rules that involve those countries, such as rules to track registration or login attempts originating from those countries. If a prohibited country changes, simply update the list instead of updating every rule that uses it.

Lists can consist of the following types of data:

- Countries
- IP addresses
- Strings
- [Wildcards](#)

**Note:** Lists support CIDR notation for IP address ranges.

---

## Creating a List

Create both Corp and Site lists using these steps.

### Corp Lists

1. From the **Corp Rules** menu, select **Corp Lists**. The corp lists menu page appears.
2. Click **Add corp list**. The add corp list menu page appears.
3. From the **Type** menu, select the type of data the list will contain.
4. In the **Name** field, enter the name of the list.
5. Optionally, in the **Description (optional)** field, enter a description for the list.
6. In the **Entries** field, enter the items that will comprise the list. Each entry must be on its own line.
7. Click **Create corp list**.

**Note:** Only Owners can create, edit, and delete Corp Lists. This is because Corp Lists have the ability to manipulate traffic across every site and other user types can only manage Rules and Lists for sites they have access to.

## Site Lists

1. From the **Site Rules** menu, select **Site Lists**. The site lists menu page appears.
2. Click **New list**. The new list menu page appears.
3. From the **Type** menu, select the type of data the list will contain.
4. In the **Name** field, enter the name of the list.
5. Optionally, in the **Description (optional)** field, enter a description for the list.
6. In the **Entries** field, enter the items that will comprise the list. Each entry must be on its own line.
7. Click **Create site list**.

---

## Using a List

When creating a rule, select **Is in list** or **Is not in list** for the operator, then select the list from the value dropdown menu.

---

Field	Operator	Value
<div>IP Address</div>	<div>Is in list</div>	<div>Example IPs (IP)</div>
		<div>Add list</div> <div>Preview list</div>

For more information about creating rules, see [Rules](#).
